

December 8, 2016

Minister for Justice of the Slovak Republic Lucia Žitňanská
Ministerstvo spravodlivosti SR, Župné námestie 13, 813 11
Bratislava, Slovakia

Dear Minister Žitňanská,

Dear Slovak Presidency and Delegates to the Council of the EU:

According to the Presidency of the Council of the European Union, the Justice and Home Affairs Ministers will meet in December to discuss the issue of encryption. At that discussion, we urge you to protect our security, our economy, and our governments by supporting the development and use of secure communications tools and technologies and rejecting calls for policies that would prevent or undermine the use of strong encryption.

Encryption tools, technologies, and services are essential to protect against harm and to shield our digital infrastructure and personal communications from unauthorized access. The ability to freely develop and use encryption provides the cornerstone for today's EU economy. Economic growth in the digital age is powered by the ability to trust and authenticate our interactions and communication and conduct business securely both within and across borders.

The United Nations Special Rapporteur for freedom of expression has noted, "encryption and anonymity, and the security concepts behind them, provide the privacy and security necessary for the exercise of the right to freedom of opinion and expression in the digital age."

Recently, hundreds of organizations, companies, and individuals from more than 50 countries came together to make a global declaration in support of strong encryption. We stand with people from all over the world asking you not to break the encryption we rely upon.

Sincerely,

Access Now, and the following supporters from 82 countries around the world:
