

#KeepitOn: Joint letter on keeping the internet open and secure in Iraq

Re: Internet shutdowns in Iraq

Your Excellency Minister Naim Rabei, Minister of Communication in Iraq

We are writing to urgently request that you restore and ensure the stability and openness of the internet in Iraq. We have received reports that your government has shut down the internet making connectivity unreliable and sporadic during the recent protests. On behalf of the more than 200 organizations from over 70 countries that make up the #KeepitOn Coalition, **we implore you to keep the internet on.**

Internet shutdowns harm human rights and economies

Research shows that internet shutdowns and violence go hand in hand. [1], [2] Shutdowns disrupt the free flow of information and create a cover of darkness that shields human rights abuses from public scrutiny. Journalists and media workers cannot contact sources, gather information, or file stories without digital communications tools.[3] Justified for various reasons, shutdowns cut off access to vital information, e-commerce, and emergency services, plunging whole communities into fear. Disruptions also destabilize the internet's power to support small business livelihoods and to drive economic development. A 2016 study by the Brookings Institution, a prominent think tank, revealed that shutdowns drained \$2.4 billion from the global economy between 2015 and 2016. [4]

The open internet has fostered unprecedented creativity, innovation, and access to information and to other kinds of social, economic, cultural, and political opportunities across the globe. The technical means used to block access to information online often dangerously undermine the stability and resiliency of the internet. **Internet shutdowns must never be allowed to become the new normal.**

The current crisis in Iraq will be further exacerbated by internet shutdowns. **We estimate the shutdown will cost your country \$135, 827,000 per day in direct economic costs, and will slow the realization of economic, social, and cultural rights broadly.** [5]

Internet shutdowns violate international law

A growing body of findings and resolutions hold that intentional disruptions to the internet violate international law. The UN Human Rights Council and the UN General Assembly have passed, by consensus, multiple resolutions that unambiguously condemn internet shutdowns and similar

#KeepItOn

restrictions on freedom of expression online. For example, the UN Human Rights Council in Resolution A/HRC/RES/32/13:

Condemns unequivocally measures to intentionally prevent or disrupt access to or dissemination of information online in violation of international human rights law and calls on all States to refrain from and cease such measures.

Experts from the United Nations, Organization for Security and Co-operation in Europe (OSCE), Organization of American States (OAS), and the African Commission on Human and Peoples' Rights (ACHPR), declared that internet "kill switches" can never be justified under international human rights law, even in times of conflict. [6]

We respectfully call on you to:

- Ensure that the internet, including social media, is restored
- Publicly declare your commitment to keep the internet on, and to notify the public of any disruptions
- Encourage telecommunications and Internet service providers to respect human rights through public disclosures on policies and practices impacting users.

We are happy to assist you in any of these matters.

Sincerely,
