

NGAO :Building digital resilience comic strip

for journalists, politicians and human rights activists ahead of elections

Implimented By Core23lab with the support of Accessnow

Elections are critical times in which the digital space acts as a civic space for many different stakeholders but without communities attaining digital resilience skills they are left vulnerable.

Meet Jean a journalist, Françoise a human rights activist, Mireille a female politician running for a senator position and fifi a digital security expert as they take us through ways to build digital resilience during elections.

Hi ! My name is Fifi and today I will take you through some tips needed to build your digital resilience towards elections. Do you have any questions for me ?

Yes Fifi, I am a human rights activist. How do I continue engaging my audience and pointing out human rights concerns during elections ,when social media sites are blocked ?

As a human rights activist, elections are a crucial time for you to ensure human rights are respected. To access social media during election you can do the following

1. Verify and test blocked websites/platforms and apps using OONI
2. Use VPN to access blocked content

OONI

What
is OONI ?

OONI

OONI is an app that allows you to Test the blocking of websites and apps and measure the speed and performance of your network....

OONI

...you can download and install OONI app on your device android device through app store and IOS device through app store. Before downloading make sure your VPN is off

<https://play.google.com/store/apps/details?id=org.openobservatory.ooniprobe&pli=1>

<https://apps.apple.com/us/app/ooni-probe/id1199366366>

Aha,
what is a
VPN?

VPN

A VPN is a virtual private network that enables you to access blocked websites and contents.

VPN

Ok,
is this
free?

VPN

Some
VPNs are free
,others have to be
purchased

VPN

What are
some free VPNs I
can use in case of an
internet shutdown ?

VPN

Some of
free VPN you can
use are :PSIPHON,
Lantern and
Tunnelbear.

PSIPHON.a free VPN that can be downloaded here [:https://psiphon.ca/](https://psiphon.ca/)

Lantern also a free VPN found at https://getlantern.org/en_US/index.html

Tunnelbear a free VPN found at <https://www.tunnelbear.com/>

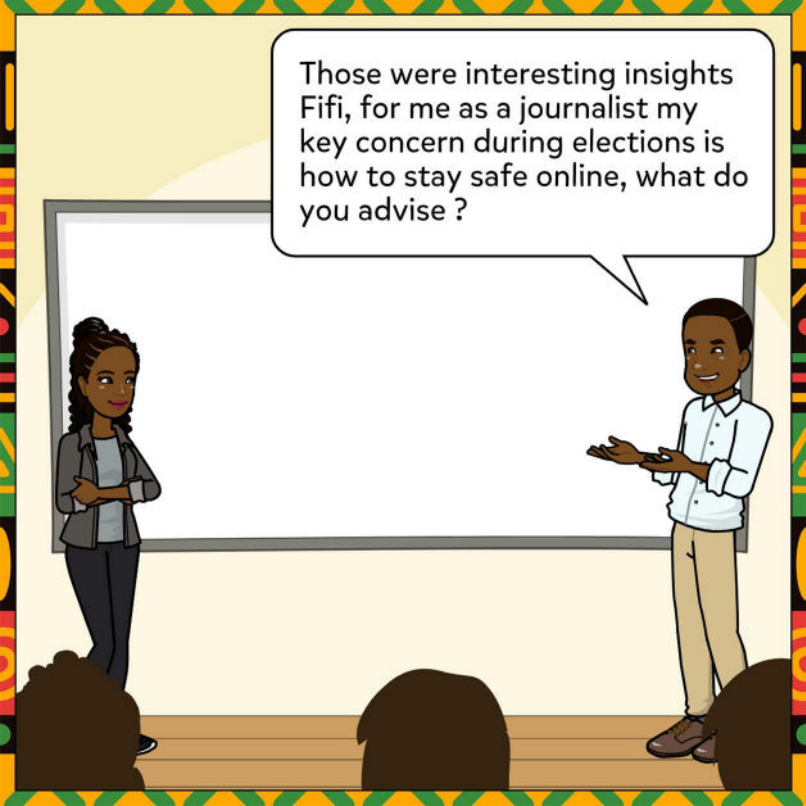

I didn't know this before. Does this work when I want to access a blocked website ?

Yes it does but you can also use Tor Browser ,to use it you need to download and install tor browser in your device.

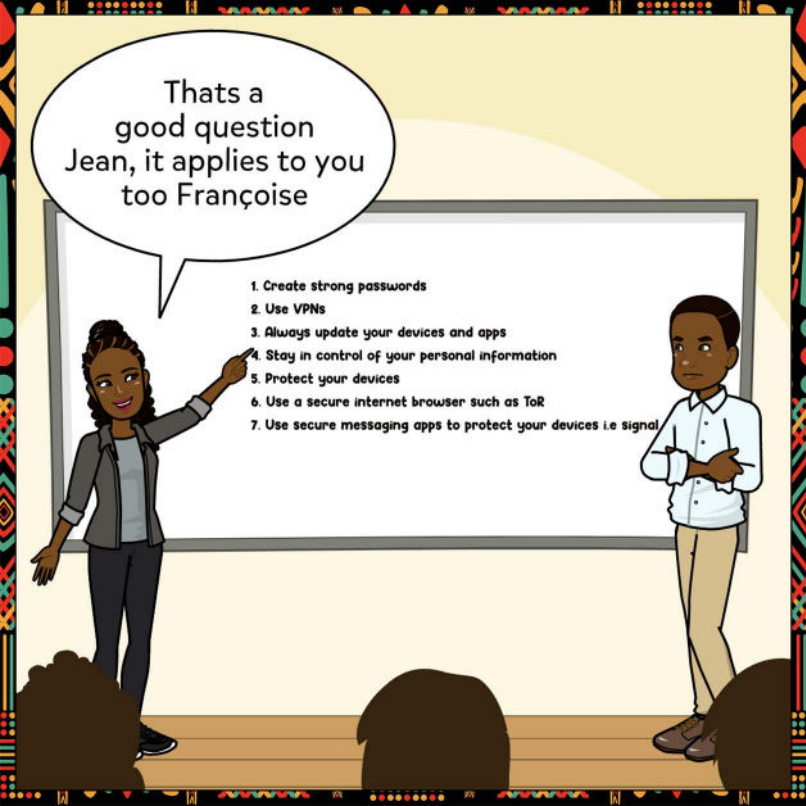

Tor Browser

Those were interesting insights Fifi, for me as a journalist my key concern during elections is how to stay safe online, what do you advise ?

Thats a
good question
Jean, it applies to you
too Françoise

1. Create strong passwords
2. Use VPNs
3. Always update your devices and apps
4. Stay in control of your personal information
5. Protect your devices
6. Use a secure internet browser such as Tor
7. Use secure messaging apps to protect your devices i.e signal

Thanks Fifi, I feel ready
for the coming elections.
What role can I play to
build the digital
resilience of others ?

That is a good question Jean, everyone has a role to play and everyone needs to have digital resilience skills....

...As a journalist you can share this security tips with other users and you can also report on various digital issues such as how to stay online.

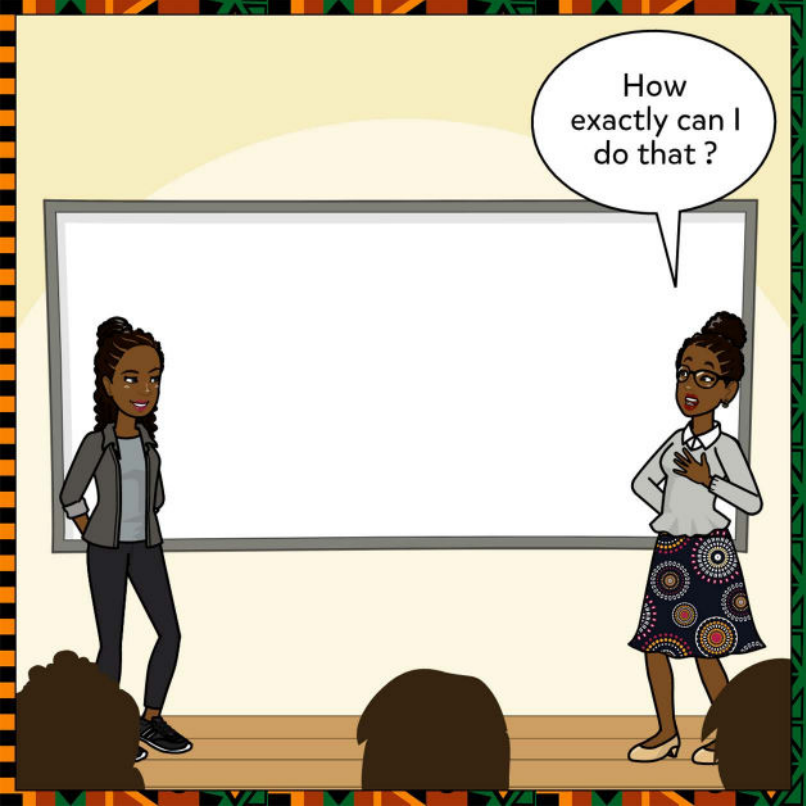

How about me as a woman politician, what role can I play to ensure digital resilience during elections ?

Politicians are important figures in this case, you can advocate and share digital security tips for other candidates but you can also advocate for the digital space to remain open during and after elections.

How
exactly can I
do that ?

There many
ways you can ensure
this but this three are
important

1. Push back on laws that legitimize internet shutdowns
2. Build partnerships with stakeholders
3. Ensure internet shutdowns do not happen

I see as a legislator I have a key role to play before and after elections at ensuring my people and country build digital resilience

Exactly !

Thank
you Fifi for
sharing this
important
information

There
is a lot to do
together !

There are many resources available to you during elections such as AccessNow's digital security helpline which offers 24/7 digital security support.

Accessnow's Digital Security

Thank
you Fifi !
